3. Summary of material accounting policy information

Financial reporting framework

The general purpose financial statements of the company have been prepared in accordance with the requirements of the *Corporations Act 2001*.

Statement of compliance

The general purpose financial statements of the company have been prepared in accordance with Australian Accounting Standards – Simplified Disclosures and other authoritative pronouncements of the Australian Accounting Standards Board.

Basis of preparation

The financial statements are presented in Australian Dollars (\$AUD), which is also the functional currency of the company.

The material accounting policy information that has been used in the preparation of these financial statements are summarised below.

Revenue from contracts with customers

Revenue is recognised on a basis that reflects the transfer of promised goods or services to customers at an amount that reflects the consideration the company expects to receive in exchange for those goods or services.

Revenue is recognised by applying a five-step model as follows:

- 1. Identify the contract with the customer
- 2. Identify the performance obligations
- 3. Determine the transaction price
- 4. Allocate the transaction price to the performance obligations
- 5. Recognise revenue as and when control of the performance obligations is transferred

Income taxes

No provision for income tax has been raised as the company has self-assessed as being exempt from income tax under Div 50 of the *Income Tax Assessment Act 1997*.

Inventories

Inventories are measured at the lower of cost and net realisable value. Cost of inventory is determined using the first-in-first-out basis and is net of any rebates and discounts received. Net realisable value is estimated using the most reliable evidence available at the reporting date and inventory is written down through an obsolescence provision if necessary.

Property, plant and equipment

Land and buildings

Land is shown at fair value, based on periodic, at least every 5 years, valuations by external independent valuers, less subsequent depreciation and impairment of buildings. The valuations are undertaken more frequently if there is a material change in fair value relative to the carrying amount. Any accumulated depreciation at the date of valuation is eliminated against the gross carrying amount of the asset and the net amount is restated to the revalued amount of the asset. Increases in the carrying amounts arising on valuation of land and buildings are credited in other comprehensive income through to the revaluation surplus reserve in equity. Any revaluation decrements are initially taken up in other comprehensive income through to the revaluation surplus reserve to the extent of any previous revaluation surplus of the same asset. Thereafter decrements are taken to the profit and loss.

Depreciation

Property, plant and equipment, excluding freehold land, is depreciated on a straight-line basis over the assets' useful life to the company, commencing when the asset is ready for use.

The depreciation rates used for each class of depreciable assets are shown below:

Fixed asset class	Depreciation rate
Buildings	2.5%
Plant and Equipment	15 – 20%

Right-of-use assets

Right-of-use assets are depreciated on a straight-line basis over the shorter of the lease term and the estimated useful lives of the assets, as follows:

	2025	2024
Plant and equipment	1 – 5 years	1 – 5 years

Intangible assets

Indefinite life intangibles assets

Indefinite life intangible assets are not amortised and are subsequently measured at cost less any impairment.

Poker machine entitlements are considered to have an indefinite useful life. The company tests for impairment annually, irrespective of whether there is any indication of impairment.

Trade and other payables

These amounts represent liabilities for goods and services provided to the company prior to the end of the financial year and which are unpaid. Due to the short-term nature, they are measured at amortised cost and are not discounted. The amounts are unsecured and are usually paid within 30 days of recognition.

Liabilities relating to contracts with customers

Contract liabilities

A contract liability is recognised if a payment is received or a payment is due (whichever is earlier) from a customer before the company transfers the related goods or services. Contract liabilities include deferred income. Contract liabilities are recognised as revenue when the company performs under the contract (i.e., transfers control of the related goods or services to the customer).

Significant judgement in applying accounting policies

When preparing the financial statements, the directors undertake a number of judgements, estimates and assumptions about the recognition and measurement of assets, liabilities, income and expenses.

Estimation uncertainty

Information about estimates and assumptions that have the most significant effect on recognition and measurement of assets, liabilities, income and expenses is provided below. Actual results may be substantially different.

Inventories

The directors estimate the net realisable values of inventories, taking into account the most reliable evidence available at each reporting date. The future realisation of these inventories may be affected by future technology or other market-driven changes that may reduce future selling prices.

Useful lives of depreciable assets

The directors review their estimate of the useful lives of depreciable assets at each reporting date, based on the expected utility of the assets. Uncertainties in these estimates relate to technical obsolescence that may change the utility of certain depreciable assets.

Long service leave

The liability for long service leave is recognised and measured at the present value of the estimated cash flows to be made in respect of all employees at the reporting date. In determining the present value of the liability, estimates of attrition rates and pay increases through promotion and inflation have been taken into account.
